

CommuteStream PUBLISHER PROGRAM

Monetize your transit app with the ad network that pays up to 5x more*.

CommuteStream significantly increases your transit app's ad revenue.

Actual CommuteStream Deal

Fast Implementation

Setting up our SDK is easy. Less than an hour of integration time and your ready to serve ads with a higher RPM.

Higher Earnings

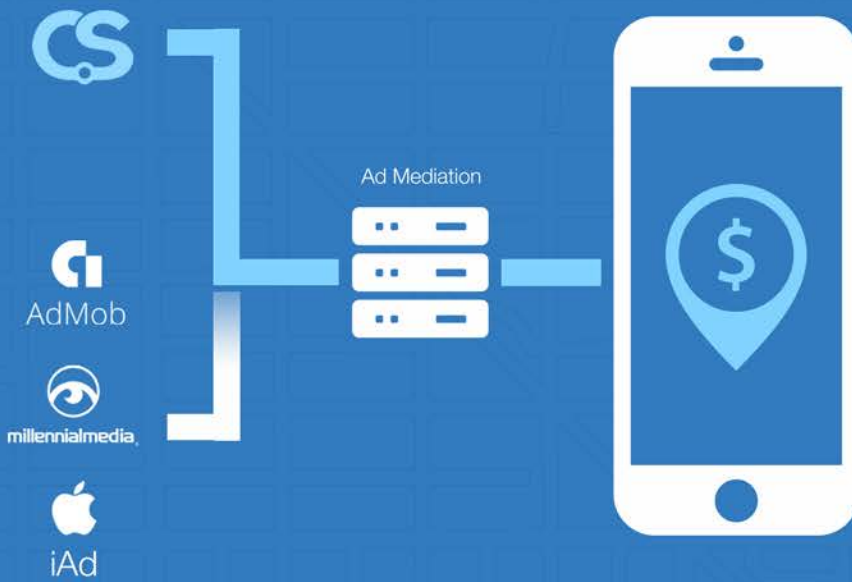

Selling directly to advertisers, and serving ads directly to partner apps, we pay better than any other network.

Enhanced UX

Deliver ads, deals, events, business offerings and individualized content that your users will love.

CommuteStream is the most effective, and lucrative way to monetize public transit apps.

Our SDK works with industry-leading mediation solutions to ensure you never miss an opportunity to maximize your ad revenue.

Monetizing niche apps to their fullest potential isn't easy... Implementing CommuteStream's software development kit was a seamless process and still allows me to use other ad networks through mediation. Per-impression, CommuteStream pays tremendously more than any other network, and in addition to increasing overall revenue, the hyper-local banner ads enhance the user experience for our users.

Jason Shah
Chicago Transit Tracker

CommuteStream is the first network designed to deliver hyper-targeted ads to my unique set of users. Tens of thousands of people trust Routesy to get them to work on time each day, and showing the most relevant ads possible helps me honor that trust by providing a less distracting experience to my customers. The lucrative RPM and easy integration on top of my existing AdMob mediation setup makes CommuteStream a no-brainer for my app business.

Steve Peterson
Routesy

CommuteStream pays substantially better than my other ad networks; for me that's an overall 260% higher RPM. The ads themselves improve the overall user experience of Transit Stop, and effectively connects my app to the communities it serves

Jason Kramer
Transit Stop

Earn up to **\$4 RPM** based on your app's features.
